28 September 2023, 9:30-17:00

Workshop

Dr. Valeska Russo
Completion of the PhD. Moving confidently forward to the next career step

Content:
In this training, PhD students will envision their next career step and analyse what it takes to get there. They will learn to use the Business Model You® approach. This model helps each person to clarify its interests, skills, values, and abilities. They can additionally assess their value to potential employers.
One of the most important factors to find the next job in science is networking. Part of the training will deal with this topic on different levels. The PhD students will assess their current network. They will work on strategies to expand their network. And they will be part of a group of peer students who they can rely on and network with.

Learning objectives:
• To uncover what unique skill set one has
• To analyse what job fields could fit to ones skills and potential
• To implement Business Model You® to envision the next career step into one of these fields
• To understand the importance of networking

Methods:
Teaching input, individual work, group work, peer coaching

Workshop language: English

Venue: Humboldt-Kabinett, Department of Computer Science, Rudower Chaussee 25, 12489 Berlin, 1st floor (between Haus 3+4)

The event is aimed at PhD students in their last year, max. 20 participants.

Please register by mail until 21 September:
