September 26, 2017, 3:00 – 6:00 pm

in the Institute of Physics, Christian-Gerthsen-Hörsaal, Newtonstr. 15, 12489 Berlin

#### Hidden figures?

#### Perspectives and opportunities for women in the natural sciences today

As a kick-off event for the new program WiNS Adlershof (Women in Natural Sciences) under the umbrella of FiNCA, we cordially invite you to the film screening of “Hidden Figures” (USA 2016).

Theodore Melfi’s celebrated film is based on the authentic story of three brilliant African-American scientists who were involved in one of NASA’s largest projects in the early 1960s: to introduce human space travel. The film tells the commitment and perseverance of the three protagonists in overcoming hurdles and everyday discrimination on their way to recognition and equality in a racially segregated society. Its exemplary story serves as an occasion to discuss current perspectives in a subsequent panel discussion on how a program such as WiNS Adlershof can contribute to equal opportunity in science.
